Wake Forest researcher says breakthrough cases are not as frequent as speculated

Richard Craver

Aug 15, 2021

0

“Breakthrough cases can and do happen, and the delta variant is certainly presenting new challenges,” D’Agostino McGowan said. “I want to know the probability of getting infected if I am vaccinated compared with the probability of getting infected if I am not vaccinated.”

D’Agostino McGowan said the confusion and misconceptions is coming mostly from “looking at the proportion of breakthrough cases among all infected, rather than among all vaccinated.”
